

MAINTREX

Bellows

for pressure and vacuum lines

Bellows for expansion joints and in compensators are muffling machine and process vibrations. They can be used to compensate, mounting inaccuracy, to connect moving machine parts to static pipe lines or as sealing elements where pipe systems pass through walls.

Maintrex supplies rubber bellows from synthetic rubbers; EPDM, NBR and Viton with synthetic fabric or steel wire to reinforcements.

Bellows are available in many types like single arch, multi arch, and reducer type, offset type, sleeve type etc, and also available in many sizes from 25mm NB up to 2500 mm NB.

For more information, please contact Maintrex sales.
